

# Azure Virtual Desktop for financial services

Azure Virtual Desktop empowers financial service providers to innovate and diversify the experiences of clients and employees through end-to-end security, rapid modernization, and secure remote access while staying inside industry regulations and effectively managing risk.

## Enable secure remote work

Make large scale remote work possible with secure platforms that offer industry standard low latency connection

## Improve risk management

Ensure data security and industry compliance through full configuration and control of your virtual environments

## Modernize payment infrastructure

Rapidly deploy new product, services, and side-step prohibitive costs to meet evolving customer demands

## Azure Virtual Desktop

Quickly deploy virtual desktops and apps to enable secure remote work for a hybrid workplace

Deliver the only multi-session Windows 10/11 experience

Enable optimizations for Microsoft 365 apps for Enterprise

Create and stream apps to deliver SaaS solutions to employees and constituents

Deploy and scale virtual desktops in minutes

### Enable secure remote work for employees, traders, and banking partners

- Access Windows desktops and apps from anywhere on unmanaged devices for employees, traders, and partners.
- Utilize virtual, high-powered computing desktops with low latency connection to enable high frequency trading and access to key workloads for app developers.

### Optimize risk management and regulatory compliance

- Provide secure and compliant access to corporate data internationally based on regional or user-specific permissions and regulations.
- Fully control the configuration and location of your virtual machines to maintain compliance across regions with critical industry certifications (PCI, SOX, SOC 1, and SOC 2).

### Modernize core banking and payment infrastructure

- Migrate legacy data and apps to Azure for increased agility in rolling out new products and services for banking, payments, and trading.
- Reduce hardware refresh costs and procurement timelines.

*Microsoft and Azure provide a really compelling value proposition. Microsoft is growing faster than its competitors, and I think Azure Virtual Desktop is just going to add fuel to the fire.*

**- Warren Street: Senior Vice President of Cloud Services, FIS**

## Why Microsoft virtualization for financial services?

### Intuitive user experience

- Connect from any platform
- Familiar Windows interface
- Scalable performance
- Simplified management

### Enhanced security

- Advanced security services
- Reduced attack surface
- Granular access control
- Isolated user sessions

### Cost effective

- Optimize costs with Windows 10/11 multi-session
- Up to 72% savings with pay-as-you-go pricing
- No multiple licensing costs, based on eligibility
- No lengthy hardware procurement
